

Business Requirements Document

Project Name	<i>Smart Save: A Digital Savings & Budgeting App for Young Professionals</i>
Document Status	Draft V1.0

1.0 Executive Summary:

SmartSave targets the growing segment of young professionals struggling with inconsistent saving and poor spending visibility. The app will use AI and automation to simplify money management, offering real-time insights, goal-setting tools, and smart saving triggers. Designed for ease and engagement, it includes features to boost retention and encourage financial discipline. SmartSave aims to increase user conversion and lifetime value by delivering a personalized, intuitive, and habit-forming financial wellness experience.

2.0 Purpose of the Document:

This document aims to

1. Define the business and functional requirements for the Smart Save app.
2. Serve as a reference for developers, designers, and QA teams.
3. Ensure all stakeholders share a common understanding of project scope and objectives.

3.0 Project Overview:

Managing money can feel overwhelming, especially for young professionals, freelancers, and small business owners who are juggling work, life, and financial goals. That's where Smart Save comes in. It is a friendly, intuitive app designed to simplify saving, spending, and budgeting, so users can take control of their finances without the stress.

Built for busy individuals aged 22–35, including:

1. Young professionals; balancing their salaries with rent, loans, and social life.
2. Freelancers with irregular incomes who need help smoothing out cash flow.
3. Small business owners who want to separate personal and business finances while growing their savings.

These users are tech-savvy but don't want complicated spreadsheets or rigid budgeting apps. They need a tool that works for them, not the other way around.

Smart Save acts like a personal finance coach, offering:

1. Automated Savings
 - a. The app quietly moves money into savings based on smart rules
 - b. AI learns spending habits and suggests the best times and amounts to save, making it effortless.
2. Real-Time Spending Tracking
 - a. No more guessing where money goes. The app automatically categorizes expenses (food, bills, entertainment) and shows clear, visual reports.
 - b. Alerts users if they're overspending in a category before it's too late.
3. Budgets That Adapt to You
 - a. Unlike rigid budgets that feel restrictive, Smart Save adjusts recommendations based on actual spending.
 - b. Users can set personal goals (e.g., a vacation fund or emergency savings) and track progress with encouraging reminders.
4. Bank Integration You Can Trust
 - a. Link one bank account securely (with encryption and two-factor authentication) to enable automatic tracking and savings.
 - b. No manual entry needed, transactions update in real time.

Smart Save works across Android, iOS, and web, so users can check their finances on the go or at their desk.

The app will be developed and launched with a focus on launching the most essential features first. Future updates will add even more ways to make finances stress-free.

Money management shouldn't feel like a chore. Smart Save meets users where they are whether they're just starting to save, rebuilding after a tight month, or planning for bigger dreams. By combining automation, AI, and simplicity, it turns financial stress into confidence, one smart save at a time.

4.0 Business Objectives:

The Primary objectives of Smart Save project is to Design and deliver the complete business and functional requirements for the SmartSave mobile/web app within 4 weeks, enabling AI-driven spending tracking, budgeting, and automated savings for young professionals.

5.0 Scope of the Project:

In- Scope:

Feature	Description
AI-Powered Savings Recommendations	Analyzes spending habits to suggest optimal savings strategies.
Budgeting & Goal Tracking	Set monthly budgets and track savings goals (e.g., vacations, emergencies).
Automated & Manual Savings	Users can set their savings to be automatic or manually saved.
Single Bank Account Integration	Link one account for transaction tracking and auto-saving.
Expense Categorization & Insights	Auto-categorizes spending (e.g., food, utilities) with visual reports.
Monthly Savings Challenges	Gamified prompts (e.g., "Save \$50 this week") to motivate users.

AI Chatbot (Basic Support)	Answers FAQs (e.g., "How to adjust budgets?") via text.
Push/Email Notifications	Alerts for goals met, overspending, or tips.
Security (2FA + Encryption)	Protects user data with two-factor auth and bank-grade encryption.
Basic Internal Admin Tool	Internal tool to monitor app performance and user activity.

Out-of-Scope:

Potential future features not included in MVP.

Feature	Description
Multiple Bank Account Linking	Supporting savings/transactions across multiple linked accounts.
Gamification/Rewards System	Points, badges, or cashback for hitting savings milestones.

Payroll Integration	Direct savings deductions from employer payroll systems.
Business Account Features	Tools for small businesses to manage company savings.
Multi-Currency/Forex Support	Saving or converting funds across foreign currencies.
Group/Peer Savings Goals	Shared savings pools for families/friends (e.g., joint trips).
Voice Assistant Capabilities	Voice-controlled savings via Alexa/Google Assistant.
Advanced Financial Reports	Exportable PDF/CSV reports for taxes or accountants.

6.0 Key Stakeholders:

1. Product Owner/Project Sponsor
2. Business Analyst Team
3. Legal Advisors
4. Tech Vendors / API Partners
5. Developers / Engineering Team
6. UI/UX Designers
7. Marketing Team
8. Young Professional Users
9. QA/Testers
10. Finance Team
11. Customer Support Team

Stakeholders	Roles	Responsibilities
Product Owner/Sponsor	Visionary and Decision-maker	- Defines product vision and goals. - Approves scope, budget, and timelines.
Business Analysis Team	Requirements Analysts, Process Modelers	- Gather and document business requirements. - Facilitate stakeholder workshops . - Validate solutions against business needs.
Legal/Compliance Team	Legal Advisors, Compliance Analysts	- Ensure app complies with financial regulations (e.g., data protection, banking laws)
Tech Vendors/API Partner	Integration Specialists	- Provide and maintain APIs for bank connections - Support data exchange and testing with app infrastructure
Developers/Engineering Team	Technical Builders	- Build mobile app and back-end systems - Implement AI logic, banking integrations, and security features
UI/UX Designers	Designers	- Design intuitive user interfaces - Create wireframes, prototypes, and visuals based on user research.
Marketing Team	Product Marketers, Digital Marketers , Promotion Strategist	- Develop and execute go-to-market strategy - Handle user acquisition and retention campaigns
Quality Assurance Team	QA Testers	- Test app functionality, performance and usability.

		- Identify bugs and verify fixes before launch.
Finance Team	Finance Analysts, Budget Officers.	- Monitor development and marketing budgets - Ensure financial planning aligns with business goals
Customer Experience Team	Customer Support Officers, CX Officers, Relationship Officers	- Provide in-app and email support for users - Report recurring issues and user pain points to the product team.
Young Professionals	End Users	- Provide feedback during testing phases - Validate if features meet their needs and expectations

7.0 Business Requirements:

7.1 Functional Requirements

- 1. User Account Management**
 - a. FR-01: Users can create accounts using email or phone number
 - b. FR-02: Users can enable two-factor authentication (2FA)
 - c. FR-03: Users can reset forgotten passwords via email/SMS
- 2. Bank Integration & Transactions**
 - a. FR-04: Users can link one primary bank account
 - b. FR-05: System automatically imports and categorizes transactions
 - c. FR-06: Users can manually add/edit transaction categories
- 3. Savings Features**
 - a. FR-07: Users can set up automated savings rules (round-ups, percentage of income)
 - b. FR-08: AI suggests optimal savings amounts based on spending patterns
 - c. FR-09: Users can create and track multiple savings goals
- 4. Budgeting Tools**
 - a. FR-10: System generates personalized budget recommendations
 - b. FR-11: Users receive alerts when approaching budget limits
 - c. FR-12: Budgets automatically adjust based on actual spending
- 5. AI & Notifications**
 - a. FR-13: Chatbot answers common financial questions
 - b. FR-14: System sends weekly spending summary notifications
 - c. FR-15: Users receive savings milestone celebrations
- 6. Reporting**
 - a. FR-16: Dashboard shows spending by category (pie charts/trend graphs)
 - b. FR-17: Users can view monthly savings progress
 - c. FR-18: System generates PDF reports of financial activity

7.2 Non-Functional Requirements:

- 1. Performance**
 - a. NFR-01: App loads in 2 seconds on mid-range devices

- b. NFR-02: Transaction updates occur within 5 minutes of bank sync
- c. NFR-03: Supports 10,000 concurrent users without degradation

2. Security

- a. NFR-04: All user data must be kept safe while it's being sent or stored , like using a secure digital envelope (like HTTPS) and strong locks (encryption) to protect the data.
- b. NFR-05: Passwords must be protected in a way that makes them unreadable even to the system itself, so no one can see or guess them easily.
- c. NFR-06: Security tests must be done regularly (every 3 months) to check for any weak spots or ways hackers might try to break in and fix them before they become a problem

3. Compliance

- a. NFR-07: GDPR/NDPR compliant data handling
- b. NFR-08: PCI DSS compliance for financial data
- c. NFR-09: Regular compliance audits (bi-annually)

4. Usability

- a. NFR-10: 90% of test users complete onboarding in less than 3 minutes
- b. NFR-11: All key functions accessible in less than or 3 taps
- c. NFR-12: WCAG 2.1 AA accessibility compliance

5. Reliability

- a. NFR-13: 99.5% uptime SLA
- b. NFR-14: Data backups performed daily
- c. NFR-15: Disaster recovery within 4 hours

6. Compatibility

- a. NFR-16: Supports Android 10+ and iOS 14+
- b. NFR-17: Responsive web interface for desktop access
- c. NFR-18: Dark/light mode support

7. Scalability

- a. NFR-19: System scales to support 100,000 users
- b. NFR-20: New features deployable without downtime
- c. NFR-21: API rate limiting to prevent abuse

8. Maintainability

- a. NFR-22: Code documentation covering 100% of critical functions
- b. NFR-23: Mean time to repair (MTTR) less than 2 hours for critical bugs
- c. NFR-24: Automated test coverage $\geq 80\%$

8.0 Assumptions & Constraints:

Assumptions

1. User Behavior

- a. Users will link at least one bank account for full functionality.
- b. Most users prefer automation over manual tracking for savings and expenses.

2. Technical

- a. Bank APIs will allow secure, real-time transaction data access.
- b. AI recommendations will improve as more users engage with the app.

3. Market & Adoption

- a. Young professionals will prioritize financial tracking if the app is simple and engaging.
- b. Early adopters will refer others if the app delivers clear value.

4. Compliance

- a. The app will meet GDPR/NDPR and financial data security standards without major delays.

Constraints

1. Development Limits

- a. MVP will support only one linked bank account (multi-account support is future scope).
- b. No payroll integration or business finance tools in the first release.

2. Resource Limits

- a. The budget restricts advanced features like gamification or voice assistants at launch.
- b. Timeline (July–August 2025) requires prioritizing core features over "nice-to-haves."

3. Technical Dependencies

- a. Relies on third-party banking APIs, delays or limitations could impact functionality.
- b. Offline mode will not be available; users need internet connectivity.

4. User Education

- a. Some users may need guidance to trust AI-driven savings suggestions.

9.0 Success Criteria:

Smart Save will be considered successful if it achieves:

User Adoption & Engagement

1. 10,000+ downloads in the first year.
2. 80% of active users engage with spending insights or savings features at least once a week.

Financial Impact

1. 15% increase in average monthly savings per user within 6 months.
2. 60% of users follow at least one AI-generated nudge (e.g., savings tip, budget adjustment).

Usability & Trust

1. 90% satisfaction rate in post-launch usability testing (ease of use, clarity of features).
2. Zero major security breaches or compliance violations post-launch.

Business Growth

1. 35–50% ROI in Year 1, scaling to 70%+ in Year 2 with premium features.

10. Approval & Sign-off:

Prepared By: Team 1

Project Sponsor : Smart Save

Product Owner : Dominica I.
